

Quarry

Sunway Quarry Industries is one of the leading producers and suppliers of crushed rock aggregates and asphalts in the country. The company provides comprehensive range of single sized and blended aggregates to meet most of the demand of building and construction industries. The company also manufactures large range of asphalts products to cater to and to comply with various agencies and highway authorities' specification. The year 2005 marked the return of the Group into the quarrying business, once the country's leading producer of aggregates and asphalts prior to the divestment in 1999.

"Our business is structured and focused to meet our customers' requirements and we continuously look for total customer satisfaction."

*Teh Quen Chang
Executive Director*

Growth Drivers:

- Expanding our operations to good locations, along potential development corridors, within the country so as to provide a comprehensive network to serve our customers better.
- Continuous and aggressive process re-engineering to cut down the cost of production albeit rising fuel cost.

2006 Milestones:

- Set-up of a new quarry operation in Bandar Sungei Long, Mukim Ulu Langat, Selangor.
- Relocation of a 250 tonnes per hour ("tph") asphalt plant from Klang Valley to Bukit Mertajam, as a step towards building up market share in the northern states of Peninsular Malaysia.
- Undertaking quarrying and premix operations in Jhansi, Uttar Pradesh and Kota, Rajasthan in India – an overseas highway project undertaken by SunCon.

We provide a full range of crushed stone aggregates to meet the demands of building and infrastructure requirements.

We have comprehensive network of asphalt manufacturing plants providing excellent customer support.

Our asphalt manufacturing products in road surfacing meet and comply with Highway Authorities and JKR specifications.
